

ROLLER TABLES IN A FLEXIBLE DESIGN

AHCON roller tables are an important element of an assembly line, where ergonomics and good workflow must be ensured.

The roller tables guarantee that the wheels can be fed forward effortlessly from unit to unit in the assembly line – in a good and ergonomic working height.

AHCON roller tables match the other units in AHCON assembly lines and can be mounted with different kinds of optional equipment.

FEATURES

- Steel rollers with a surface made of soft plastic and fitted with smooth-running steel ball bearings
- Galvanized frame and legs
- Adjustable feet including a floor anchor set for a safe installation
- Fits together with IT 200 and IT 1000
- Can be equipped with different types of extension tables, that secures maximal flexibility of the length of the roller tables
