Test Lane 90 I L

The 901L is the modern Altus® modular digital display for test lanes. Multiple configurations of floor units, peripherals and accessories can be connected to create a test lane for passenger cars and light commercial vehicles exactly adapted to the needs and possibilities in your workshop. The 901L comprises the latest microprocessor technology. It is designed in such a way that all electronics are inside the read-out unit. Therefore, no separate relay boxes necessary!

901L standard features

- Infra-red remote control hand set.
- Brake difference indication left/right per axle.
- Digital sideslip- and suspension results for frontand rear axle.
- Memory for storage of test results for serviceand parking brake.
- 0 Wheel lock indication lamps for left and right.
- 0 Brake efficiency calculation for service- and parking brake after manual weight input, or automatic weighing with a suspension analyser or weighing system.
- Recalling off all values and brake efficiencies. 0
- 4x4 reversible roller kit.
- Ovality & rolling resistance measurement.
- Wall bracket included.

Combo®

(Standard for 4x4 testing)

We supply options as standard!

Digital display

Contains a large digital dual LED brake force scale for the left and right wheel. The outer LED's represent left and are displayed in red. The inner LED's represent right and are displayed in green.

Software

Fully automatic test program

Digital display

Contains a large digital LED display for a clear presentation of all numerical values for sideslip, suspension, brake forces, differences left/right and brake efficiencies.

Display options

- 0 Pivoting wall bracket
- 0 **Pedestal**
- Printer drawer
- 0 Matrix printer
- Inkjet printer
