

## SINGLE POST LIFT

DH-2500

Easy to operate.

DH-2500 lift has an independent working mechanical locking system to secure the hydraulic drive.

### **Electro-hydraulic lift with 2500 kg lifting capacity**

The 1-post lift DH-2500 gives full accessibility to the vehicle. Both sides of the vehicle are free. Vehicle can be placed in more than one way on the lift. Ideal for body repair work.

The NORDLIFT DH-2500 is a space saving, reliable and long lasting single post lift that gives you full access to both sides of the vehicle and therefore making it ideal for body repairs.

Nordlift DH-2500 with a lifting capacity of 2500 kg can raise a vehicle of that weight to over 2 meters in less than 30 seconds. Note the distance between the vehicle and the lift post, plenty of room for access all around the car, even open the driver's door. The adjustable arms allow for individual jacking at manufacturers specified points and are long enough for free access and jacking of vans and transporters.

Standard lifting pads are fast and easy to use. Extensions are recommended for vans and transporters.

- The DH-2500 has a lifting capacity of 2.5 t.
- Lifting height over 2 meters.
- Space saving construction.
- Drive-on height only 100 mm.
- Independent working mechanical locking system.
- IP 54 protection.
- Available 3 Ph and 1 Ph power supply options.
