

ALU SLIM Clear Tape - FE 1200 x 5g adhesive wheel weight on a roll - painted grey

Steel adhesive wheel weight, zinc-coated, grey/black painted, on a 6 kg roll, SLIM type (1200 x 5g) with special no-residue tape. The ideal solution that guarantees precise balancing of passenger car alloy wheels.

Description

Steel adhesive wheel weight, zinc-coated, grey, on a SLIM type roll weighing 6kg (1200 X 5g) with a special no-residue tape. The ideal solution, which guarantees precise balancing of passenger car alloy wheels, stable mounting as well as quick and easy dismounting. As a manufacturer of wheel weights, we offer products of the highest quality. Each batch of wheel weights is tested in our laboratory under strictly defined standards.

Advantages:

- Special no-residue tape
- Precise balancing
- Easy and quick demounting
- Double layer protective coating to guarantee protection against corrosion
- No risk of damaging the rim
- Thickness including the tape is only 4 mm, which makes the wheel weights practically invisible
- Precise wheel balancing.
- The wheel weights adapt perfectly to the rims thanks to an elastic tape.
- Strong adhesive tape for permanent mounting of the wheel weight on the rim
- Easy to use an efficient thanks to the plastic roll.

Technical data

- Adhesive tape that leaves no residue
- Colour: grey
- Total weight of a wheel weight - 5g
- Roll weight - 6 kg (1200x5g)
- Height - 4 mm
- Material - steel
- Protective coating - zinc + powder paint
- Pieces per package - 1 roll
