

# NENAB®

## **NENAB HPG8-8 AIR-HYDRAULIC JACK**

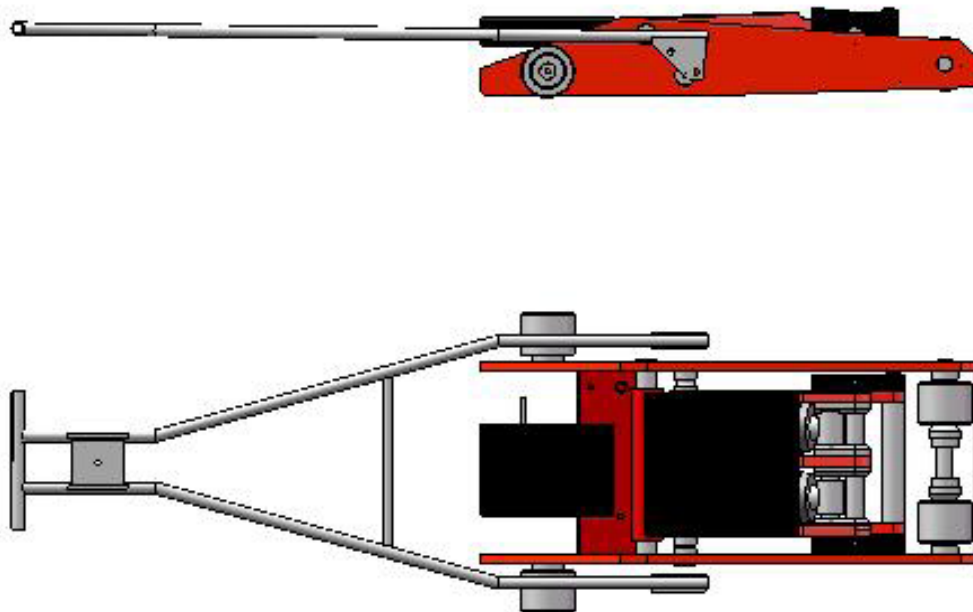

**Lifts 8 tonnes at 8 bar for buses and vehicles with low as 150mm ground clearance.**

Functional operation, high quality and extremely long life provide the best guarantee for sound investment.

The lift is reliable, easy to work, quiet, service-friendly and meets very high standards for security, speed and stability.

Note that the lift is equipped with control for quick travel to lift position and air powered return which gives quick lowering even when unloaded. Lifting time until wheel hangs freely is about 15 sek.

Patented drive unit with double pressure cylinders for maximum safety.

When the swivel support is lowered, the jack's ground clearance is increased, which makes transport over uneven surfaces easier.

Width across transport wheels = 390 mm

Total length = 1800 mm

Total weight = 150 kg

Min. work height = 150 mm

Max work height = 520 mm

The jack, which is ruggedly dimensioned and robust despite its low initial height, is equipped with double internally ground and hard chromed lifting cylinders with ground and hard chromed piston rods.
